

SCHOLARSHIP AVAILABLE!

UNM-Los Alamos Community Education Services is now accepting student applications for scholarships for the "Teen's Games & Computer Program".

Scholarships in the value of \$80.00 are available to students to be applied to the tuition of \$160. A limited number of RASSI (Regional Alliance Summer Science Institute-Reaching the Pinnacle) scholarships (funded by National Science Foundation) are available to teens with learning, physical disabilities or financial need-base status. Applicants would participate in the hands-on computer game development and design curriculum.

Introduction to Game Development (Grades 8th-12th)

Learn the basics of video games design! Create games that you can teach your friends and create a video game in Starlogo! This exciting course also teaches basic games play designs and the brief history of Video Games from their original creation in 1954 to present day.

L303/30004 R. Leonski Wed. June 08-29 1:00-5:00pm \$160

Game Design Intermediate (Grades 8th-12th)

In this course students will learn how to design video game levels for 2d and 3d games! They will also learn how to create their own basis game designs and create professional game design documents. This course is for any student interested in professional game design.

L309/30005 R. Leonski Wed. July 06-27 1:00-5:00pm \$160

The faculty member will be assisted by assistants and a nurse available for students with special needs.
